All Natural Premium Soft Ice Cream

“The Ultimate Cold Comfort Food”

NANA Services’ *All Natural* Premium Soft Ice Cream is made using only the freshest ingredients. Our *All Natural* milk is certified Hormone Free, which ensures that neither rBST or any other growth hormone is used in our cow milk production. Additionally, we use only ingredients that are accepted by the Natural Food Industry, like-honey, cane sugar, fruit juices, cocoa, vanilla, and other natural flavors. And since our dairy has received certification from the Organic Trade Association, we guarantee that we are delivering the highest quality product while maintaining its naturally healthful benefits. Your customers can enjoy a product that is not only good, but “good for you.”

NANA Services has partnered with Archibald Frozen Desserts to deliver not only novel and exceptional soft ice cream products, but also a dispensing platform that is setting new standards in the industry.

We offer two significant improvements to conventional soft ice cream offerings in a restaurant or institutional setting. First, we have shifted responsibility for the manufacturing of ice cream products from restaurant-site food service personnel to a centralized dairy production facility. This allows food service personnel to concentrate on their core competency of serving their customers, without being burdened by the mixing of formulas and related sanitation concerns, product waste and inconsistency, frequent equipment downtime and high maintenance requirements -all of which entail incremental labor costs and higher operating expenses.

We have accomplished this first improvement by replacing large, expensive and difficult-to-operate manufacturing equipment with our innovative and patented “EROS®” dispensing system that has a small “footprint,” a low price point and minimal maintenance needs.

Secondly, we have introduced a large range in the variety and quality of the soft ice cream produced itself. No longer are uninspired versions of the two basic flavors of soft ice cream a customer’s only choice. With our ready to serve *All Natural* Premium Soft products our equipment dispenses a product that is not pumped with air, but is consistent with a higher quality, more dense premium ice cream. Many of our flavors have real fruit, chocolate chunks and/or candy inclusions, and all of our flavors earn their “Premium” description.

Our NIQI brand of *All Natural* Premium Soft ice cream products are produced at a centralized dairy, so the only limit to the menu of flavors and textures is our clients’ wishes. If you are tired of the same few old soft ice cream flavors, NANA Services’ offers an exciting product menu with the variety your customers crave.

“We know subsistence.”

EROS[®] Operational Benefits

(Extruded Refrigerated Operating System)

Eros[®] offers its operators a streamlined approach to profitability by providing customers with consistent, high quality frozen confections using this reliable, proprietary platform. These confections include Soft Ice Cream, Frozen Yogurt, Sorbets, and Custards.

Operator Ease and Customer Choice

The innovative Eros[®] system combines simplicity and quality, allowing the customer to choose from a wide variety of flavors and an endless choice of inclusions, ranging from chocolate chips or baked goods to bits of real fruit. Ask your local rep about our custom flavor program.

Right Size, Right Price-Fully Scalable

Eros[®] offers the smallest countertop footprint and the lowest equipment cost of any high volume frozen confection delivery system in the food services industry.

Uses a standard 110V electrical outlet.

Machine Size: 16 ¼² Width x 30 ½² Length x 27² Height.

Machine Weight: 145 lbs.

Simplicity and Reliability

Eros[®] innovative design allows its operators to avoid the cumbersome process of employee training, daily confection production and cleaning/maintenance. The Eros practical design also results in high up time, while preventing frustrating equipment malfunction and the resulting loss of revenue.

High Quality and Hygienic

Eros' innovative design, which eliminates contact between the product and the equipment, drastically reduces the dangers posed by bacteria build up. This design feature provides its operators with peace of mind and their customers with a safe, healthy product. The finished product is shipped directly from the dairy, ensuring consistency and that the product is always of the highest quality.

Soft Serve Specification Information	
Brand	NIQI
Case Pack: (Gal)	2.3 Gal
Case Yield: (oz)	294 oz
Case Dimensions (in inches)	9.5" x 9.25" x 10.5"
Case Cube ft	0.5340
Gross Weight (lbs)	12.5
Pallet Configuration	20TI x 6HI (40x48, 4")
Gross Pallet weight (lbs)	1570
Cases/pallet	120
Temperature Zone	-15 to 0 degrees F
Shelf Life	365 Days
